Do I need to be a member to fly there?

Yes, access is only available to members. Prospective members can fly in the presence of a member, subject to certain conditions.

What does it cost?

Membership is an annual fee and approximates less than \$3.50 per week. Current fees can be obtained from our web site.

Where do I apply for membership?

Membership forms are available from our web site or by contacting the Secretary listed on the opposite page.

Where are we located?

We are located at the Symmons Plains property on the Midland Highway, approximately 10km south of the township of Perth. Entry is via the property access road on the LHS of the highway (travelling south).

Advantages of Club Membership

The most important advantage of club membership must be the **peace of mind and confidence** that comes from full insurance. All Tasmanian clubs are affiliated with the state's governing body, the Tasmanian Model Aeronautical Association Inc. that is in turn managed by the Model Aeronautical Association of Australia Inc. The MAAA sets the rules and regulations and sources insurance cover for our sport.

The next important aspect is the help and companionship gained from like-minded enthusiasts. This help is not only in flying but all phases of the hobby including the most suitable model and radio gear to purchase which saves you money right from the start.

Club membership also provides a safe and legal place to fly, with less chance of causing damage to both people and property. The club is located at the Symmons Plains property, just north of the racetrack.
